## Work Experience

---

### Felix Payment Systems

Permanent Full-time

Full-Stack Engineer

April 2023 - Present

*Felix Payment Systems is a leading provider of innovative Soft POS payment services. As a forward-thinking fintech company, we offer cutting-edge solutions that enable businesses to accept secure and seamless card payments through their cloud terminal.*

#### Job Responsibilities:

- Developing a full-stack web app for automating the onboarding process of new merchants to Felix Cloud Terminal and Elavon.
- Creating the frontend using Next.js and implementing the backend with Express.js on a Linux Nginx server.
- Integrating the app with the company's CRM and Portal systems to ensure seamless data flow and real-time updates..
- Documenting the application's architecture, code, and processes to facilitate knowledge sharing and future development.

### Garden Intelligence

Contract Full-time

Full-Stack Engineer

Nov 2022 - April 2023

*Garden Intelligence turns on-chain data into revenue by providing customers with actionable insights so that they can understand their users better and seek revenue-generating opportunities on the blockchain.*

#### Responsibilities:

- Develop Express.js APIs for wallet interactions, project segments, and transaction insights.

- Improve user management using Stytlch API with speed, scalability, and security.
- Contribute to building CI/CD pipeline with Github actions.
- Attend Daily Standups and participate in Sprint Reviews and Retrospectives.
- Write, review, and maintain code and documentation to meet team standards.

#### Highlights:

- Created reusable components and Auth context.
- Enhanced core data grid with filter functionality for historical transactions.

## HomeChow.ca

Internship

Frontend Developer

Jan 2023 - April 2023

*Homechow is a platform that connects customers with talented home chefs for delicious, homemade meals delivered straight to their doors as well as a marketplace for vendors and offers flexible work opportunities for drivers. We aim to support local businesses and create a community around authentic, home-cooked food.*

#### Job Responsibilities:

- Develop fast and error-free front-end components using NEXT.js (Typescript) and styled-components.
- Conduct code reviews to improve code quality. Highlights:
- Implemented efficient Firebase Auth services for user management and security.
- Utilized Storybook for creating reusable component stories.
- Developed an order management dashboard.
